

GOVERNMENT UNIVERSITY PROJECT

To provide a higher education with extremely high standards to better improve the knowledge and skills of the citizens and members of the Imperial Republic, and to make it possible and affordable for those not normally able to produce the funds necessary for their education. These universities are highly competitive and maintain the highest standards of learning. There are many other accredited-private schools, colleges, and universities throughout the galaxy, some which are very highly held in great esteem and prestige, that rival and surpass that of Stratus University. Some of these are also sponsored by the the GUP, meaning they receive funds (though limited amounts) and scholarships are sometimes awarded by the GUP for individuals to attend these higher learning organizations. The GUP primarily funds and operates Stratus University, though it sponsors and assists others in limited operational and support methods.

Intergalactic Universities
